1829
Decr

This day left the dock at Eadyataum
hauled out into the Sound let go
anchor and in a few days we had
all things ready for sea but by some
dislike our mate John Perkins left
the ship and it was some days before
we obtained the one we now have, but
on the 9th of Decr we left from Fairhaven
Cove the American coast, and from this
to the 20th we experienced rugged and
barbarous weather keeping our ship
hard too under that sail the most of
the time

Mon

Decr 21

Attended with fair weather and a light
West wind came O S S

Tues

22

Attended with a light Westerly wind and
fair weather at 3 o'clock this afternoon we
saw a shoal of sperm whales and lowered
two of our boats for them but could
get no chance at them and came on board
in a short time when a merchant ship passed
by us name unknown

Wed

23

Attended with fair weather a light West wind
and a gentle shower of rain in the
afternoon

1829

Decr
Thurs

24 Attended with fine weather this mor-
-ning and a light W. wind but
at eight o'clock it began to rain and
blow a strong gale at one o'clock (P.M.)
we was boarded by an unlucky sea
which threw me & our boats upon the
Leeward Quarter carried away the
reef upon the Lee side and put us
all in confusion for some time -

Frid

25

Attended with a strong N. Wind weather
cold and squally

Sat

26

Attended with fine weather and a gentle
S.W. wind

Sund

27

Wind, S.W. and the weather dark and
raining

Mon

28

Attended with strong, S.W. wind and
dark squally weather

Tues

29

Weather fine and calm - - - - -

Wed

30

Wind S.W. with a shower in the morning
and squally through the day - -

Thurs

31

Attended with a strong S wind weather
dark and squally through the day - -

- 1850
Jan
Fri 1 Attended with fine pleasant weather

100
Wind
Log

10 Wind shifted to W at one o'clock this morning
to W we were under sail at the same time
about 11 o'clock the sea from the North and
at 7 o'clock we were sailing S by E and
at nine o'clock it began to be a gale and
we took all sails and lay to under
staysails the remainder of the day -

Lat 59° 0' Long 62° 0' W

100
Wind
Log

11 Wind S by W and weather fair but squally
we had under double reefed topsails
until 11 o'clock when it moderated and we
made all sail

Lat 58° 30' Long 62° 10' W

1881

Mon

22

Wind S.W. and weather fine. Sea 3-4 miles off.

Tue

23

Wind W. and "cloudy" with squalls at times which prevented looking to the south.

Wed

24

Wind S.W. and weather rainy with a heavy swell on the sea. Ice kept under double reef till dark and it came on so fast that we were obliged to take in nearly all sail before twelve o'clock at night.

Thurs

25

Wind has blown a gale from South since last night accompanied with some snow. Ice continued without ceasing through the day with the heaviest swell on the sea that I have ever seen. At 5 o'clock in the evening the gale abated and at 7 it became calm so that we made sail for after.

Fri

26

Wind W. and weather rainy in the morning but more moderate. At night we made sail the gale and at 2 o'clock P.M. when it became so squally that we hauled nearly all sail and were continuing blowing a gale.

Monday
1830
Oct

Wind N and weather cloudy in the morning but at ten o'clock it became calm at the same time we saw the lights but the wind continued to blow hard in the afternoon and part of the night.

Lat $60^{\circ}30'$ Long $60^{\circ}00'$

Tuesday

Wind S W and weather cloudy throughout the day with blowing a gale which continued all day with ship swells of course and hail.

Lat $57^{\circ}30'$ Long $55^{\circ}00'$

Wednesday

Wind S W and weather cloudy with some calm at ten o'clock but cleared off in the afternoon and again manifested to a gale before night.

Lat $55^{\circ}02'$ Long $55^{\circ}00'$

Thursday

Wind N and weather squally in the morning but the wind died away and became pleasant and fair in the afternoon.

Lat $50^{\circ}00'$ Long $40^{\circ}00'$

Friday

Wind S W and weather fair with a light breeze all day but in the evening a sudden and unexpected squall came on great confusion as it struck our sails, all back and had it been a little more severe our ship would inevitably

have succeeded and you saw the
weather continued equally all day and
all night we started sails we have
too

1830

Wed
Thurs

Lat $56^{\circ} 0' S$ Long $70^{\circ} 0' W$

Wind blowing a gale from South East
we lay the under Staysails until midnight
more when it moderated so that we made
in the afternoon we reefed and set the main
sail Wind shifted to E and at Eleven o'clock
we by our good luck and sailed 4 knots
on haul -

April 11

Sund

Went to the little of it in the morning we have all sail out and a sperm whale the morning about 12 of a mile off but as our boats were all in we could not leave for the harbor until it began to rain and blow a strong gale which obliged us to land at 10 o'clock and to stay the night at the night

Lat 52° 18' Long 73° 10' W

Mon 12

Went to the harbor in the morning all day and ship was too with a strong gale of wind and in the morning a gale of wind at noon it began to moderate and we made sail in the afternoon Lat 50° 30' Long 73° 10' W

Tues 13

Attended with a light N.W. wind and fair weather but a rugged sea

Lat 52° 18' Long 73° 10' W

Wed 14

Attended with a light N.W. wind and fair weather we put all our canvas up at 11 o'clock and away it all day Lat 50° 30' Long 73° 10' W

Thurs 15

Attended with a light N.W. wind and cloudy weather some W.S.W. with common sea and began night Lat 52° 17' Long 72° 30' W

1850

Apr 18
Wed

At 10 o'clock we went for a walk in the
park and continued
until 5 o'clock. The weather
was very fine and
the sun was shining
at 5 o'clock.

Apr 19

Went to the market in the
morning under a clear sky. At
12 o'clock the wind shifted
and the weather became fine.

Apr 20

Attended with a moderate N.W. wind
and fine weather. At 1 o'clock
the sun was shining and the
weather was very fine.

Apr 21

Attended with a light S.W. wind and
fine weather. At 1 o'clock the
sun was shining and it continued
fine with a gentle
shower of rain at 2 o'clock. The weather
was very fine.

Apr 22

Attended with a strong S.W. wind and fine
weather. At 1 o'clock the sun was
shining and the weather was
very fine.

1890

April 21

Wed

Wind S and weather fair morning &
 light breeze. At 11 came a squall on
 reaching gulf in the afternoon so that
 we could only carry our topsails down
 reefed. Lat $48^{\circ}30'$ Long $82^{\circ}54'$

Thurs 22

Wind S and weather fair (breezing)
 At 11 AM night it is cloudy and the
 wind shifted to S. Lat $48^{\circ}30'$ Long $82^{\circ}54'$

Frid 23

Attended with a strong S wind and
 cloudy weather came at 11 AM
 but can hear Lat $46^{\circ}50'$ Long $80^{\circ}50'$

Sat 24

Wind N by E and weather cloudy at 4
 a black P.M. it began to rain and con-
 tinued until 7 o'clock at night

Sun 25

Attended with a strong S wind and fair
 weather making 8 PM on a S course -
 Lat $45^{\circ}20'$ Long $80^{\circ}20'$

Mon 26

Wind S and blowing a gale weather cloudy
 on ship some time before we reached
 our destination Lat $45^{\circ}10'$ Long $82^{\circ}21'$

Tues 27

Attended with a light N wind and cloudy
 weather it began to rain at 1/2 past eleven o'clock
 and continued all day with a heavy rain from
 11 AM to 11 PM. At 11 AM we set sail at 11 AM
 Lat $43^{\circ}0'$ Long $81^{\circ}20'$

1801

April 17

Attended with a light E by N wind and fair weather all day & caught a head of herring. The ship was in the bay this day & on a head-land first for the ice on a small ship.

Lat 41°30' Long 81°0'W

May 21

Attended with a light W wind and fair weather. Herring. The ship was shifted to the ice & a vessel and we were ship.

Lat 41°10' Long 81°15'W

June 30

Attended with a strong E wind. Close hauled upon the Leeward tack and making steam. 6 P.M. on having but it came on to blow a strong gale since we took in all our sails & we were late too until nearly night when it was a light breeze and we made some land.

Lat 41°0' Long 81°0'W

July 1

Aug 1

Sept 1

Oct 1

Attended with a light E by N wind and fair weather.

Lat 41°0' Long 81°0'W

Nov 1

2

Lat 41°0' W. clear with a light breeze and it began to rain at night. This forenoon the wind shifted to S and the weather became cloudy. The wind so strong that we were obliged to anchor at night. The ship was in the bay.

Lat 41°0' Long 81°0'W

1539
May
27

Attended with a strong NW wind and
some rain in the morning. Some rain in the
evening. It began to rain -
Lat $36^{\circ} 45' N$ Long $75^{\circ} 10' W$

May 28

Attended with a light NW wind
fair weather. Crossed the equator
in the latitude of Duck Creek
when we reached Lat $36^{\circ} 45' N$ Long $75^{\circ} 10' W$

May 29

Attended with a moderate NW wind
cloudy weather. In the morning
saw a ship off our bow. It was
the same as ourselves and we
made land in the same course
we went. It was St. Mary
Island. We then made a land and
steamed off. Lat $37^{\circ} 10' N$ Long $75^{\circ} 10' W$

May 30

We left the island in the morning
in the afternoon when we
saw the weather. It was
we again stood off noticing the
ship we saw yesterday. Lat $37^{\circ} 10' N$ Long $75^{\circ} 10' W$

May 31

We left the island in the morning
in the afternoon when we
saw the weather. It was
we again stood off noticing the
ship we saw yesterday. Lat $37^{\circ} 10' N$ Long $75^{\circ} 10' W$

1850

May

Wed 12

Wind S and weather dark and rainy
This day we have up our
anchors and are in about 10 miles and
see the land then we hope to

Thurs 13

Attended with a light S Wind and fine

22

At

Attended with a light sea wind and
showers in the forenoon at Glenelg
this day we have left anchor and
left Conception and sailed
until the weather became so calm that
we were able to go on board and
for a line to the Gilliam and take
the ship in tow until Glenelg
in the evening when a sharp and sudden
squall came up and struck our boats
all back we immediately came on board
hauled on round the ship got under way
and stood off from land the weather
at this time being moderate it was not
much diffidence that I was obliged
to have the ship in tow and it
- ended us a plentiful supply of
sorts of great quantities of
of our own country, a kind of
- some wine is here very plenty which
- tastes the principal drink of the
- the principal drink of the
the French the French the French
to be fruitful and the
cultivation it was a little in a
the French the French the French

of all the people who are common to the
 but the old people of the village
 live with the old and old
 - and is choosing to live in the
 the house by a life although they
 are very friendly and hospitable to stran-
 -gers and are very friendly to the
 who are in the house with all the family
 - and they are very friendly to the

Sat 27

Attended with a light S wind and
 very warm and pleasant at 8 o'clock this
 afternoon our Professor is from about
 about one half of a mile off the shore and
 quarter we landed the two land and boats

as soon as they he and went after
him but before we got near he turned
his flukes and went down and
when he again came up he was near
the ship and was quite landed his
boat but all our efforts were of no
avail as we came on board at sunset
unsuccessful. - Lat 28° 0' S Long 70° 10' W

Observed with a light S.W. wind fair
and pleasant weather at eleven o'clock came
two boats off for a while which we
saw from the ship but not
nigh enough to discern he was nor
a sperm and then returned to the ship again
at 1/2 past 4 o'clock saw a sperm whale
about 1/2 mile off the starboard bow
we ran near to him with the ship
but it being so late in the day we did
not lower down boats for him
Lat 26° 30' S Long 70° 10' W

Observed with a light S.W. wind and
fair weather at eleven o'clock came
two boats off with all sails set

Mind

Attended with light winds and cloudy
weather since 10 W. W. then about
a shoal of sperm whales were seen from
the main head about six miles off
we immediately put the ship off for
them and when we came within reach
launched our two Larboard boats the starboard
boat first got the chance and struck
one soon after we struck another which
we killed in a short time and took to
the ship at the time the other boat had
towed the starboard boat out of our sight
and the starboard one had gone in
pursuit of them as far as look we from
the ship got sight of them boat till
we got close for them but it was
dark before they came on board when
we learned that the Capt's boat had
been accidentally upset and the other
boat was obliged to get from the whale
and pick them up with the help of a boat
etc

Attracted with strong winds cloudy and
equally weather Lat $4^{\circ}30'S$ Long $88^{\circ}20'W$

Attracted with strong winds cloudy and
equally weather at 2 o'clock (PM) we saw
a large shoal of sperm whales which made
up to the ship and killed one and got
some others Lat $4^{\circ}30'S$ Long $88^{\circ}20'W$

We went on board at 10 AM and got accompanied
by squalls of rain at 1 o'clock (PM) we saw
a large shoal of sperm whales which made up
near the beam near the ship near them and
all the boats went down the boats were
some of them a shoal of sperm whales which
one of the boats went out and got the whale
and killed it with a spear. Then we sailed
we hastened up the second time and started
the ship and it again up and
got a slightly which saw was down
the main boat then went up and got two
of the sperm which it had moments and
near extract the other two boats went out
after got the leave chance at home so the weather
had been to the water house and out
line and let the ship be in 7 PM

1898
July 1

At 8 o'clock P.M. saw a school of sperm whales
off our bow. One of the ship's crews then came
off their boats went after them but they came go
ing fast. The undersides of the whales
were visible to the ship.

2
Thurs

11. Attendance, the light winds were so much
pleasant weather riding at anchor

12. This morning weather being so clear and
fine we went from the ship with our boats
to the mouth of the river and thence up
the river five or six miles with a view of
what we got our first view of the mouth
of this river is a large bay also called the
bay of the sea because uncommon high
when the tide is ebbing no flowing water
this makes it almost impossible for any other
craft than a canoe boat to pass the bar
of this river present to the eye of a stranger
a very great distance it being almost
completely into the water with green bushes
so thick that it would be impossible to
land at any place on the banks here
was a variety of singing birds which made
the woodlands resound with their melody
and the alligators in the river were very
numerous and some of them as large as an
ox. As we near the mouth of this river we
saw large flocks of Pelicans that
were so tame that we could almost force
them out of view and many of the
birds were also seen upon the water and the
banks.

Jan
20

Attended with windy weather and
squally weather as the vessel this morning
in wind our boats for a sperm whale
ran up and started to that of 3 o'clock which
he then got clear of and he said that he
was engaged in the afternoon to come and
hunt for another one but could get no
chance to strike him. Jan 5th Long 1821

The tide with a strong wind and a heavy
sea on 4th of Feb. the vessel this morning
a school of sperm whales came up the
boats and went after them the men's boat
first got the chance to strike her on 4th
but did not hit him and after a long
time we came in board and saw a
small ship this day Jan 5th Long 1821

Monday with a strong wind from the north
and the vessel (Jan) saw a sperm
one and a half miles ahead of us landed all
three boats the Merton's boat got the chance
to strike him and we soon after killed
him and got him to the ship at 4 o'clock
in the afternoon. I found to be a fine
specimen of a sperm whale. Jan 5th Long 1821

Sun on ship Lat 5° 45' N Long 122° 15' W

Mon 7

Trade winds blowing nearly 2 fathoms which acca-
sioned us to reef top sails and under the
sea being rough Lat 5° 45' N Long 122° 15' W

Tues 8

Winds light and weather moderate and
fair Lat 5° 45' N Long 122° 15' W

Wed 9

Attended with a strong trade wind
and a rough sea under a squally sky
and a haul of sperm whales none

1851

sun when we landed on the shore and
 went after the land they were to the
 windward and the sea was rough. Thus the
 our efforts were in effectual

Lat 6° 58' Long 102° 20' W

Mon 10

Winds blows a strong gale and the weather
 is very rough we are cruising under
 reefed topsails in the mean time

Lat 6° 40' Long 102° 25' W

Tues 11

Wind has continued blowing in gale during
 the last twenty four hours the sea being
 very rough Lat 6° 20' Long 102° 40' W

Wed 12

Attended with light winds and fair
 weather Lat 5° 20' Long 103° 6' W

Thurs 13

Attended with light winds and fair weather
 making a @ P @ amse and a mac this day
 Lat 6° 0' Long 102° 0' W

Fri 14

Winds moderate although the weather is
 somewhat squally and rough sea in
 Lat 6° 20' Long 102° 0' W

Sat 15

Winds moderate and weather fair for
 our observation this day making am
 Lat 5° 6' Long 99° 14' W

1859

Tue 16

Wed

Winds being moderate and weather
fair we put off with us at 7 o'clock
Saw two ships ahead of us which
were quite at the distance of 10 miles
The Reuben Davis and the other
Wm. B. both of the Dufford
Lat 50° 49' N Long 99° 45' W

Thurs 17

Winds moderate and weather fair
we kept on with the Wm. and Eliza until
Eliza sailed (Linn) when we made a
change and steered the other way -
Lat 50° 49' N Long 99° 45' W

Frid 18

Winds light and weather fair this
morning at sunrise saw a ship steering
up the same track of ourselves and
about eight miles off and saw
Lat 50° 12' N Long 100° 00' W

Sat 19

Winds light and weather fair as usual
Saw a ship which was the same as
2300 lbs of sperm oil Lat 50° 8' N Long 100° 00' W

1830

Feb 20

Winds light and weather fair this morning
in light ship Rebecca first

Lat. 5° 50' N Long 100° 50' W.

Mar 21

Winds light and weather fair as before
D.M. again appear the Rebecca
Ship from Lat 6° 20' N Long 101° 00' W.

Apr 22

Attended with the light winds and fair weather
in company with the Foster

Lat 6° 08' N Long 102° 00' W.

May 23

Winds light and weather fair in company
with the Ship Foster again this day

Lat 5° 42' N Long 102° 10' W.

June 24

Attended with a strong breeze of winds and
fair weather in company with the Rebecca
Ship from Lat 6° 10' N Long 103° 00' W.

Lat 5° 10' N Long 103° 10' W.

July 25

Winds light and weather fair in company
with the Ship Foster again this day

Lat 5° 10' N Long 103° 10' W.

Aug 26

Attended with a strong trade winds and
weather

Lat 5° 07' N Long 103° 10' W.

Sept 27

A light breeze and accompanied by squalls
in the latter part of the day

Lat 5° 07' N Long 103° 10' W.

1861

Winds light and weather fair at 7 o'clock
(Am) we saw a school of sperm whales bearing
one point off and we made sail for
them but could get no chance of coming
for them until 8 o'clock when we set
out after them with all three boats. The Sunders
boat soon struck a small one which we
killed in a few minutes. The other two
boats got nothing. Lat $5^{\circ} 0'$ Long $101^{\circ} 5' W$

1861

Winds moderate and weather fair at 10 o'clock
this afternoon. Saw a large sperm
whale bearing 3 points off and we
ran the ship near him. Several of the boats
went in pursuit of him but he long
ago off and night coming on we were
obliged to give up.

Lat $5^{\circ} 25'$ Long $102^{\circ} 11' W$

1861

Winds light and weather fair at 10 o'clock
this morning. Saw a sperm whale
3 miles off and we made sail for him. The
2 boats the Sunders had struck and we
were obliged to give up in a short time.

Lat $5^{\circ} 1'$ Long $102^{\circ} 25' W$

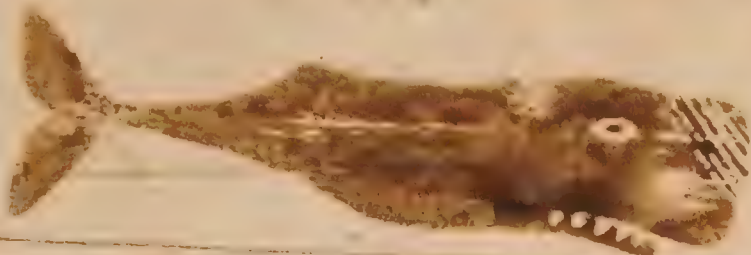

1831

Moner 3
Thurs

Winds light and weather fine as from clouds.
P. m. Saw a shoal of large sperm whales
in the bay. In the morning we made sail for the
wind before it we came in sight of them it was a
fine sight. They were a great number and were
all of the same size. They were all of the same
color. They were all of the same shape.

Frid 4

Winds light and weather fine as from clouds.
at noon saw a shoal of sperm whales.
Saw no ships for them and we to a close. The
saw landed and boats the Standard had
saw struck one of the air bubbles when it
was in the water. It was a very large one.

Sat 5

I saw on the day struck a large whale
which continued running with us until we
were nearly out of the sight of the ship.
to the windward when we cut him and let
him go.

Last night soon after dark it began to rain
and clear and has all day continued steady
in the morning we have nearly all sails
hauled down and lying by our side. It
being so rough we could not get down.

1871
Wed 6
Wind

Since last night the weather has been more
moderate and all hands at day so busy
that we have had no time to

Lat 5° 30' Long 102° 18' W

Thurs 7

Attended with a strong trade wind and equally
weather at one o'clock (P.M.) saw a shoal of
 sperm whales in a short time after we lowered
two boats and went after them but we could
get no chance at them and again came on
board and at five o'clock saw another
large whale which we could not follow
for it being so late in the day.

Lat 5° 17' Long 102° 10' W

Fri 8

Winds Light and weather fine at one
o'clock (P.M.) saw a shoal of sperm whales
which passed off to the windward before
we could reach them. Lat 5° 10' Long 102° 11' W

Sat 9

Since last night winds light and weather
fine. Lat 5° 30' Long 102° 41' W

Sund 10

Winds light and weather fine
Lat 5° 16' Long 102° 0' W

Mon 11

Attended with squally weather and a
rough sea at six o'clock (P.M.) we
lowered two boats for a sperm whale
but could get no chance at them and
came on board soon after.

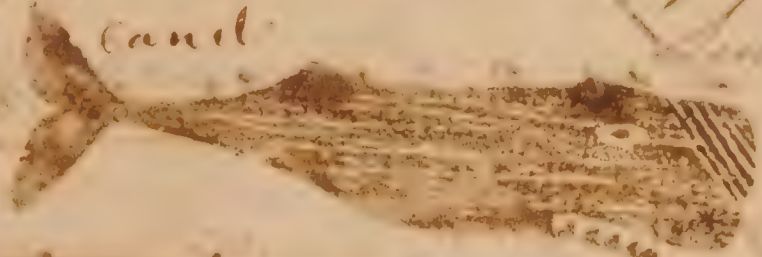

1891

Mon

arrived at 2 o'clock we landed all three boats
 saw a show of them but they coming so near
 the ship that they perceived us and made off
 as fast as they could. The wind was from the
 south and we were forced to anchor at 6 o'clock
 Lat 5° 6' Long 102° 18' W

Tue 12

Attended with strong winds and squally
 weather at nine o'clock (Am), we landed
 two boats the boat and boat struck in the
 Rilleet a small one of about 30 BBLs
 got down to the ship at mid day
 Lat 5° 20' Long 102° 24' W

71. 19

The first thing I saw on the 10th of July was
 sunrise. This morning I saw a line of hills
 W of us in the distance for it was on a
 high plain about 1000 ft high. The distance
 of the hills was at first a black line
 due to the distance of the hills. At the
 same time I saw the small islands of
 the coast which were in the distance. The hills
 of the coast were very rugged and broken
 appearance. The hills from the coast rising
 irregularly until it terminates in a
 high mountain. The top is perfectly
 covered with snow. The hills are
 a volcano whose smoke was plainly
 to be seen from the ship. The
 height of the hills were seen near the
 shore were somewhat surprised to

1111
April

meat or small game is taken by the natives
in it who perceive it was taken at a distance
hence some in order to take a few more
the most common to trade with them

May 10

According to the report we have too of
the Holmbo during the night and early
in the morning and this was nearly
surrounded with their small canoes
laden with all sorts of fruit such as the
Hollander produces. Eggs, Geese, Ducks
and Eggs &c. are got in plenty giving
them for the same a piece of Iron or Lead
as our old knife is any metal or substance
whatever. The natives are very friendly
although there is a reluctance to
showed humanity to the old and petty show

May 11

This morning we made sail and being made
the weather gave us a fair start
and let go our anchor as fast as we could
The island of Hoonah is situated
about eighty miles N. W. of Angoon the
highest point of the island is
in the shape of a triangle the land rising
from a beautiful sandy beach and rich
plain until it terminates in mountains
there is eight ships riding at anchor here
the main of which is a large schooner
which has been able to leave

1891

April 18
Wed

Windy light weather fair and warm
and only employed in mending some ship

Thurs 19

Went out with the gun boat to see the
bay. Deep hunting, a man from
the station will be in it next day.

Fri 20

Went out with the light gun boat to see the
bay. Laying out the net.

Sat 21

Went light weather fair and warm

Sun 22

Went light weather fair and warm. This day I
went out with the gun boat to see the
bay. Spent the time
in the bay. The natives who
introduced me in a most welcome and
friendly manner.

Mon 23

Went out with the gun boat to see the
bay. Spent the time in the bay.

July 10
Wednesday

Went light weather with wind coming in the
 forenoon of the day two ships in sight
 at a distance in the afternoon were
 running down to Spots to the ship Captain
 Combed by Capt. Sigourney his yards
 out 1700 Bls of air After being in some
 to see in some sperm whales in the water
 ship the hunter then took for them and
 the state of some their heads started
 and by some means lost him while
 got nothing Lat 32° 10' N Long 173° 18' E -

Thursday

11 Attended with a light breeze and fair
 weather. Made two sails this day
 names unknown Lat 29° 31' N Long 175° 0' E

Friday

12 Made 8 sails in the fore this morning at last
 all other boats for a shoal of sperm whales
 and after running ten or twelve miles gave up
 the chase and came to anchor in the night
 Since which time we have been blowing in
 Lat 29° 40' N Long 174° 10' E

Saturday

13 Attended with light breeze and fair
 weather being in Lat 29° 40' N Long 174° 10' E

14 Attended with light Easterly winds
 fair weather this morning. Saw a ship
 and six or seven at eleven o'clock some of
 which were of us which we spoke
 being the Remble of Gloucester Comm.
 Capt. Worthy brought on 2500 Bbls of oil
 the only venting in complement of 80 Bbls
 to fill the remainder of the hold by the
 Union.

Lat 29° 40' N Long 171° 12' W

15 Attended with a strong E. wind and rain
 in C. with the Remble Liner last night
 Lat 29° 35' N Long 171° 40' W

16 Wind continues to the eastward and weather
 fair. The Remble in sight of us until noon
 when we left her under sprit off N.E. at
 Lat 29° 10' N Long 172° 00' W

Attended with a light S.E. wind and fair
 weather a squall of rain which we saw at
 ten o'clock of short duration.

17 Attended with a strong Easterly wind and
 generally weather. At one o'clock we
 saw a sail which we spoke at 2 o'clock
 being the Remble of Gloucester Comm.
 with 750 Bbls of oil commencing
 in Capt. Worthy.

Lat 29° 20' N Long 172° 00' W

17 Wind strong and weather squally during
the night in the morning we took our light
battering under the ship America at this
time in sight at us soon after noon
a small vessel appeared which we
soon took to be the ship we had to do with
The Americans had first got the Chance and
beated her off with the effect the Luckland had
just got the Chance and beat her off and
she put up with some of our

rounds up a gun and shot the Dutch
privateer and then the steamer boat next
struck one which we killed being supposed
to make 50 shots at us we got our boat
slightly damaged so as to be of no use in firing
to which the America at this time came to
the assistance of us Lat 30° 0' Long 108° 0'

18 Wind with a light breeze under the ship
America at this time we saw the
ship from the America Lat 31° 0' Long 108° 0'

19 Wind with a light breeze under the ship
America at this time we saw the
ship from the America Lat 31° 0' Long 108° 0'

Attended with a light & wind since
weather at nine o'clock (Am) we got back to
the windward of a ship suspected the Union
Sat 31st Oct & Sun 1st Nov 1674

Wind continued light from the East then
of rain. Sat 31st Oct & Sun 1st Nov 1674

Sund 1st Nov 1674
Attended with little or no wind since last
night or night before in the evening a
large shoal of sperm whales came
as far as the plainy sun from 2 o'clock
at this time have been unobserved
by us until morning but we saw them
no more. The weather very much
sunny. Sat 31st Oct & Sun 1st Nov 1674

Mon 2nd Nov 1674
Sun night at 12 o'clock a great number of
young from the North Sea arrived
light until morning when it began to
rain so at this time it blew almost
a gale at 3 o'clock PM we saw a sperm
whale nearly a hundred of us but he being
to the windward could do us no
harm. At 4 o'clock we saw a
great number of sperm whales with the two
Lebanon boats on board.

Tue 3rd Nov 1674
The weather being very much
sunny we went out at 10 o'clock
PM to look for sperm whales & saw
several of them. Sat 31st Oct & Sun 1st Nov 1674

21
22
23

22 Our ship laboured hard through the night
with an uncommon rough sea and some-
times the waves in the forenoon it increased
to a strong gale attended with lightning
much loud peals of thunder and to
of rain which motivated us soon and
we soon after set our last sail we also
this day saw a sperm whale but the
rain came on so sudden that we lost sight
of him Lat 32° 30' Long 107° 40' E

23

Since last night we have had a strong
gale of winds from NW and extremely
rough weather with much rain and
much rain and respect for sails in the
noon time Lat 33° 00' Long 108° 00' E

24

Winds continues strong through the night
attended with sharp squalls and rough
sea the men of the ship we have had some
loss under a close reef and much
of the foremast Lat 33° 00' Long 108° 00' E

25

From last night until this day we have
had extremely rough weather and very much
but since that time it has become off and
is now nearly calm Lat 33° 00' Long 108° 00' E

26

Winds since last night E. to S. E. and the
fair but the sea is extremely rough
Lat 33° 00' Long 108° 00' E

1811
1st Nov

Attended with a moderate E wind & mild fair weather but a very early sea which has put our ship to labour & hands in the morning
Lat 29 42' Long 166°

2nd Nov

Attended with a westerly wind and the same squally this day we have seen three Aries motus yesterday
Lat 29 42' Long 165°

3rd Nov

Last night we by accident this morning took on board a small whale which has been shot by our late sails as four o'clock P.M. we also took in the morning three this day notice of two Aries
Lat 30 46' Long 165°

4th Nov

Attended with a light E wind and a fair weather at 2 o'clock this day we sent a ship to the windward of us suspecting cutting in a whale Lat 31 07' Long 161°

5th Nov

Wind light Easterly and weather fair although we had some squalls as we did last night and lightning this morning at sunrise this morning we passed a ship bearing and within 10 miles by 8 AM

6th Nov

Attended with light Easterly wind and fair weather this morning we noticed 3 ships and at five o'clock in the afternoon saw a sperm whale which soon left us and I directed us to the leeward
Lat 32 07' Long 157°

1531

Aug¹¹

Sund

7

Attended with light Easterly wind
fair weather saw three ships this morning

Lat 31° 0' N Long 165° 42' E

Mon

8

A light S. wind after dark. Weather fair
this day saw no ships but it has blown
down an eagle we saw two ships this
morning the one which we spoke at fair
about it being the Susan with 1000 lbs
of sugar

Lat 31° 40' N Long 166° 0' E

Tues

9

Since last night attended with a strong
S. wind and fair weather in the mean
time in Co with ship Susan

Lat 30° 0' N Long 166° 12' E

Wed

10

Attended with a strong S. wind and fair
weather in the morning we went to
see their boats for a shot by 4 pm we were
in Co with those of the Susan we arrived
a long distance to the windward here
could get no chance and at nine o'clock
came on board

Lat 30° 0' N Long 166° 15' E

Thurs

11

Last night we left the Susan and in which
time attended with a strong S. wind and
sageelly weather

Lat 29° 1' N Long 166° 40' E

1891
Aug
7th

10

Since last night the weather is very calm
and squally weather and the wind
this day from 29° 0' N long 168° 0' E

11

11

Since last night the weather is very calm
and squally weather and the wind
this day from 29° 0' N long 168° 0' E
Since this time the weather has
been wet and foggy but more moderate
Len 29° 30' N Long 166° 21' E

14

14

Weather continues wet and foggy with
a light wind blowing from the S. in
intervals Len 29° 14' N Long 167° 0' E

15

15

Since last night the weather has been calm
although the sun has shown some part
of the time Len 29° 00' N Long 167° 30' E

16

16

Weather continued rainy through the
night in the morning it became fair
with a light E. wind
Len 29° 45' N Long 167° 40' E

17

17

Since last night the weather has been
calm and squally but the wind E. wind
light Len 31° 30' N Long 166° 44' E

18

18

Since last night the weather is very
windy and cloudy weather this day
at 2 o'clock we landed on the beach and
boats for a sperm whale but after we
left the ship we saw him no more and in
two hours after came on board
Len 31° 50' N Long 166° 45' E

1841
Aug 19
Thurs

Thurs day night attended with an E
wind and remarkable variable weather
the horizon covered by blimp and
clouds clouds Lat 30° 20' Long 167° 40' E

Aug 20

Thurs day night attended with a strong
E wind and fair weather at twelve o'clock
at noon we saw a sperm whale about
one mile or half miles ahead of us
after we launched our boats and went in
pursuit of him until 10 PM when we
threw him and then we came on board
having sailed at least thirty miles from
nothing Lat 30° 20' Long 167° 40' E

Aug 21

Thurs day night attended with a strong
fair weather at nine o'clock
day we launched our boats for
sperm whales and kept going until ten
o'clock PM, when we came on board in
the moon time having been fast to one where
saw dead nearly at same line and drew one.
Then could parted the line of the other
so got clear of us we went on
board at 10 PM and found
board having lost sight of him then
we have done nothing for 24 hours
and got nothing Lat 30° 20' Long 167° 40' E

22

Thurs day night attended with a strong
the weather of a strong E wind which we had

1831

Aug

At daylight this morning at nine o'clock
saw the shore of sperm whales landed
boats soon after and returned not until
o'clock when it began to rain and blow
very much that in a short time we
two under close respects mounted on
the 3040' at Long 167° 35' E

Tue

23

Since last night the wind has blown a
gale and attended with rain we have
been able to make the land and this day
at one o'clock sent down the long
for and up the sea being very rough
the 3020' at Long 167° 47' E

Wed

24

Since last night attended with a strong
gale of wind and rain and ship labour-
ing especially upon the cargo deck which
has threatened to board us almost instan-
taneously and having attended to our
safety in the early part of the day and
very precaution taken to render our ship
secure the 3040' at Long 167° 47' E

Thurs

25

Last night the wind hauled to the E and
the weather became fair so that we
made sail this morning and sent aloft
the late gallant yard the 3040' at Long 167° 47' E

Fri

26

Since last night attended with a light
S E wind and fair weather this morning
we parted ship (considered) having
a fair breeze and made by 10
spinell some 1200 lbs of oil
the 3040' at Long 167° 44' E

Wed
27

Since last night the weather has been fair
and we are quite calm we noticed
this day the ship we spoke yesterday
Lat 32° 0' N Long 168° 42' E

Wed
28

Attended with fair weather and a calm
Since last night noticed only one ship
this day Lat 32° 0' N Long 168° 42' E

Thurs
29

Attended with a light breeze and
fair weather at sunrise about 8 this morning
we saw a sperm whale nearly ahead
of us but at 10 we lost sight of him
boats went after him but could get
no chance until two o'clock when we
saw him again but the chance
to catch him so that we made off and
we soon after came on board a ship
at this time leaving W from us

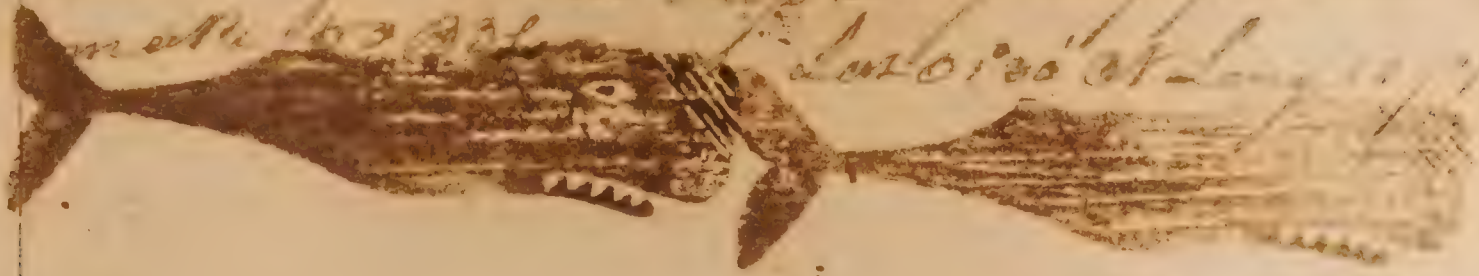

Lat 32° 0' N Long 167° 37' E

Fri
30

Since last night attended with fair weather
and a light breeze at sunrise we saw a
whale at a short distance but as we
went on we saw him soon after him
and at one o'clock the other two the whale
began jumping about in the air the
boats went to him but he was too quick
the shore was visible and that is how
they were seen to become large but the
boats did not come up and again
lost him and succeeded in killing
him and the men to boat killed the
also in a short time

1801
Aug

So that at this time we have been made
made fast to the ship being supposed to
make 10300 lbs. Lat 51° 30' N Long 107° 10' W

Wed 31

Last night we were attended with a strong
wind. Since in the morning it has subsided to a
and become more moderate but we had to
on a winter we required sea until noon when
it became nearly calm at this time we no-
ticed a sail off from the other team

1801

Sept

Thurs

Lat 52° 17' N Long 107° 58' E

Since last night the wind has been light and
weather fair with the exception of a few
squalls and some rain this day we saw
one sail only. Lat 29° 59' N Long 107° 56' E

1801

Oct

1

No material change either of wind or weather
Since last night now have we noticed
thing of moment Lat 28° 00' N Long 105° 00' E

1801

Oct

2

Since last night attended with light winds
and fair weather this morning we met with
two ships the one off Cape Lee Harbour
the other off Cape St. Lawrence Cape St. Lawrence
we saw a chase of sperm whales in the
farther but the wind being so light we were
not more than 10 miles from them. Lat 26° 00' N Long 103° 00' E
The two S. Lawrence boats gave them chase till
off until noon when we saw one

June 7 Since last night attended with a strong
easterly wind and fair weather we noticed
two ships in the morning and at noon
a sperm whale which the launch went to
for at 1 o'clock and struck until sunset
having some more hair several times without
getting any change to strike him
Lat 29° 20' N Long 168° 12' E

June 8 Since last night the wind became light
and weather fair this morning at five o'clock
we saw a school of sperm whales about 1/2
miles astern of us we at once went to
pursue and for them but they were too far
for us in their maneuvers until 7 o'clock when
our minor boat was sent after them and in
one hour after we launched our boat and the
sail and soon came up and struck him
he at the same time raised his flukes above
and raised an hour leaving us all in the
water until we were pulled up by our anchor
at our boat being in sight of us immediately
came to within distance the water was
raised up and killed the whale which we
then taken on board of the ship

This subject is supposed to make 20 Bbls of oil
and ship. having it signed by the
commander. Lat 29° 07' N Long 169° 40' E

Since last night attended with a light S & E
wind and fair weather in this morning
noticed a ship to the leeward of us trailing
and cutting before the Independence
of a bark that I believe is from the
of sperm whales we made for them and at one
o'clock our own boat was sent after them
and in one hour after we landed the other two
boats but we did not see the whales
and after about two hours came on board and
- successful at the going land of the ship
Lat 29° 07' N Long 169° 40' E

Attended with a light S & E wind and fair
and pleasant weather this morning
Three ships being in Lat 29° 07' N Long 169° 40' E

No material change of weather since last night
now here we note see any thing more than three
ships Lat 29° 0' N Long 168° 0' E

Since last night attended with a light S & E
wind and fair weather the only thing
seen this day was 3 clipper ships
Lat 23° 50' N Long 168° 45' E

Lat 168° 40' E

Since last night attended with a light N
wind and fair weather this day we have
noticed two ships this day -
Lat $29^{\circ}44'0''$ Long $168^{\circ}45'0''$ E

Sept 29

Since last night attended with a light
N wind and fair weather we have been
steaming in the moon time

Lat $29^{\circ}47'0''$ Long $169^{\circ}41'0''$ E

Sept 30

Last night we had an early calm this morning
we had a light W wind in the moon time
steaming Lat $29^{\circ}47'0''$ Long $169^{\circ}41'0''$ E

101
Sat
1

We had a strong westerly breeze last night
which subsided by some rain but it has been fine
today morning and the wind more moderate and
we have had fine weather since 6

Lat 31° 0' N Long 168° 14' E

Sun 2

We had a strong westerly breeze last night and a strong
breeze from the Northward which occasioned
us to reef our topsails before daylight and
and after darkly also took in the main
we had at noon the weather moderated
so that we again made sail the weather
being of our kind in our common regg'd sea

Lat 27° 55' N Long 168° 14' E

Mon 3

Since last night attended with a strong westerly
wind and fine weather in the morning we
we have kept a strict & course

Lat 31° 20' N Long 168° 40' E

Tues 4

We had a strong breeze of wind last night
which left us this morning and for some
hours we had an entire calm but a good
breeze sprang from N & E and the weather
became fine & we have kept a strict & course

Lat 31° 0' N Long 168° 40' E

Wed 5

Since last night the weather has been unsettled
it began to rain and blew at nine o'clock evening
to take in the main sail and mizen topsails
also double reef the others and have too much
in the morning we again made sail with a
fresh wind and an uncommon regg'd sea

Lat 31° 0' N Long 168° 40' E

June 6

6 A strong gale of wind set in last night attended with rain and vivid flashes of lightning which continued all night we were obliged to huddle under short sails until noon when it had moderated so that we again made sail W S E, Lat 30° 12' & Long 108° 40' E

June 7

7 From last night attended with fine weather Wind about E S E air calm E as night as morning Lat 30° 07' & Long 108° 40' E

June 8

8 All day with a light S E wind and fair weather at noon this day noticed a ship off our Lee Lat 30° 45' & Long 109° 00' E

June 9

9 All day with a light E wind and fair weather but a breeze came on at 3 o'clock and continued till 5 of the day Lat 30° 00' & Long 109° 40'

June 10

10 All day with a strong S E wind and fair weather at eight o'clock we saw a sperm whale off our lee bow but going so fast to the windward that we could not bring her down our side

June 11

11 Last night at ten o'clock the wind began to blow strong and at 1 o'clock in the forenoon it fell and we were enabled by a sudden calm to haul down all our sails and make some other arrangements

1806

17

Attended Change sister of of winds or
we other since last night in the morning
and then the night with the wind
Augustus Course Oct 8 Len 30.50 & 1, 18310

18

Attended in the morning with no
variation from that of the two first days & this
morning soon after sunrise we were called
off from the shore of a storm which off on
the sea and we made all our hearts and minds open
them the storm and we were about seven
one, very much we the other we soon came
and struck one about the same time
and a few struck another although not in
sight of us and after three hours
from sundown our line and made off
so that we lost him the one the Capt. Storer
saw and he also when the storm made
back in his which he soon parted and made
off so we returned about noon having
seen the moon time for two lines with our
and nothing we saw since spoke the
F. Augustus who struck in the same storm
and we saw him and got nothing
Len 29.40 & 1, 18310

19

Attended with a light S. wind and fair
we other a course has been 2 nights
as may be Len 31.00 & 1, 18310

1811
Oct
Nov

From last night until ten o'clock (am) we have
seen nothing but a heavy snow falling as
to the thermometer at this time we have 6° below
zero. Since noon it increased to a strong
gale so that we were obliged to take in the
sails and have too strange the day.

Lat $31^{\circ}03'N$ Long $169^{\circ}25'W$

Nov 21

Since last night the snow has again
increased of my it now being very severe -

Lat $31^{\circ}00'N$ Long $169^{\circ}45'W$

Nov 22

Since last night no material change of weather
the gale still raging although it has moderated
some since noon -

Lat $30^{\circ}51'N$ Long $169^{\circ}25'W$

Nov 23

Since last night attended with sharp frosts
of wind from the north and some rain
this day we have kept on our course
under double reefed topsails

Lat $29^{\circ}41'N$ Long $168^{\circ}00'W$

Nov 24

Last night we kept on our course the wind
blowing a gale from the N by E at night
about the morning it was so severe that
we took in our sails and have been
thus being ever more and more exposed to the
weather.

Lat $30^{\circ}28'N$ Long $167^{\circ}30'W$

Nov 25

Attended with a strong wind and some rain
of wind since last night the weather
being changeable and stormy.

Lat $30^{\circ}00'N$ Long $167^{\circ}40'W$

1881

Oct

25

25

At night as night closed the gale began to subside so that before daylight ice was no longer visible under double keels and we lay to wait in harbor till day and the wind moderate from E and weather fair

Lat $81^{\circ}0'$ Long $107^{\circ}20'$ W

not wind enough to fill our sails until fair
about this afternoon when we took a light breeze
from S. E. Lat 30° 40' N Long 167° 00' W

Thursday attended with fair weather and a light
breeze and Lat 31° 40' N Long 166° 50' W

Friday since last night the wind was light and changeable
which caused us to take several times this
morning we took a gentle breeze from S. E.
this morning we made a fair off wind
Lat 32° 0' N Long 166° 40' W

Saturday since last night attended with light and
changeable winds from fair weather
Lat 31° 47' N Long 166° 38' W

Sunday attended with a strong S. E. wind and fair
weather as ten o'clock in the evening we
springs a fair off wind and the day was the
same as seen the other day Lat 32° 0' N Long 166° 00' W

Monday since last night we have experienced several
changes of wind and weather but night
is long S. E. wind continued that way until

1831
@ base

from a clock (2 PM) when we left the W. side
attended with rain thunder and lightning
which caused us to take in sail and heave
our ship too but before the setting of the sun
it moderated and had the appearance of
being fair. Lat 31° 50' N Long 105° 03' W

Wed 11

Last night at six o'clock we began to make sail
the wind being light weather cloudy and calm
- but attended with sharp lightning at mid
night we had all sail set and in fresh
It continued until ten o'clock
then it began to haul to the Eastward
and is now about N E there is also an
English bark astern of us which has been
in sight of us all day. Lat 31° 53' N Long 101° 0' W

Thurs 12

Since last night attended with light E
wind and fair weather we have made
a ship this day off noon Lat
31° 40' N Long 101° 0' W

Fri 13

Since last night attended with light E
wind and fair weather -
Lat 32° 20' N Long 101° 0' W

Sat 14

Attended with the strong E breeze
and squally weather since dawn we
weighed as the wind would permit
Lat 32° 40' N Long 107° 0' W

181
Jan 10
Tues

Weather continued squally from last night
until noon about this morning when the sun
appeared and the weather moderated to last same
After it became cloudy and the wind shifted
to S & E. There has been a ship in sight this
day off our lee. Lat $32^{\circ} 0' N$ Long $158^{\circ} 0' W$

Wed 10

Last night as a storm is again to be expected
by sharp flashes of lightning which continued
about 9 hours without any cessation the wind
being W. and moderate at the time. A few birds
in flocks S & E and continued squally through
the night and all day to day the sea being
very rough. Lat $32^{\circ} 12' N$ Long $156^{\circ} 45' W$

Thurs

Attended with a steady Easterly wind
and fair weather we have made about
a S. E. course in the mean time
Lat $32^{\circ} 0' N$ Long $156^{\circ} 0' W$

Fri 11

Since last night the weather has been
fair with the exception of some light
squalls of rain which attended us to day
Wind has diminished in the mean time
Lat $32^{\circ} 40' N$ Long $155^{\circ} 40' W$

Sat 12

Attended with fair weather and a light
S. E. wind until daylight this morning
when it shifted away since that time it has
been in the S. E. Lat $32^{\circ} 0' N$ Long $155^{\circ} 0' W$

Sund 13

Last night as some clouds we have a
strong breeze from S. W. accompanied
by dense mist and clouds which the

1801
Phon

Some rain the wind increased so that
at midnight we took in our lights and
double reefed our topsails and as fire
boats we carried away the masts
gave way and took in the side lines
and the masts of the boats blowing down
at a great weather storm and blowing
Sun 02.17 at Long 158.00 W

Mon 21

Last night at one o'clock wind shifted to
the E. attended with a light shower of rain
after which the weather became fair and
breeze fresh so we sailed again at
3 P.M. Lat 02.10 at Long 150.00 W

Tues 22

Last night at six o'clock the wind began to
in our case raise the Log and by it were
going 7 knots. At 10 o'clock took
in the masts for our mizen top gallants
and by eight o'clock in the morning
we had to haul too much a close
reefed mizen top which was done
after carrying away our mizen
and set by the strength of the gale
but before we set up another and
also set down the fore and mizen
top gallants got Lat 02.00 at Long 148.00 W

111
187
Last night at five o'clock the wind shifted
to NW and the gale began to increase attended
with rain showers and lightning and so
continued several times during the morning
and we sighted vessels in the afternoon
and by evening we had all our
compasses affected with about a 50° error
and somewhat specially in other and
a rough sea on this you may be
convinced the heaviest that we have
experienced since at sea less of the
continuance Lat 02°40' N Long 150°00' W

112
Since last night the weather has been with
variable winds and squally showers
that we have been obliged to stand under
a double reefed main top and fore top
sails making about 178 miles of way in the
morning time Lat 31°00' N Long 147°10' W

113
26 Attended with a light wind and fair
weather NW wind in velocity this forenoon
when it changed to ESE and I saw 3 or 4
Lat 31°00' N Long 148°10' W

114
27 Attended with a strong ESE wind and heavy
weather accompanied by squalls of rain
at intervals Cause 3 or 4 Lat

115
28 Attended with light ESE winds and some
showers weather we have made about
Lat 32°47' N Long 148°16' W

1881

Nov 26
Mon

Since last night attended with an Eastern
wind and local and cloudy weather in
the morning we have made about an
S of E course Lat $33^{\circ} 2'$ Long $141^{\circ} 17' W$

Tues 27

Attended with steady weather and a light
E wind until noon when it changed
to S of E Lat $32^{\circ} 17'$ Long $143^{\circ} 52' W$

Wed 28

Since last night the weather has been calm
the sun obscured the most of the time by
clouds and flying clouds until late
evening and light Lat $32^{\circ} 17'$ Long $145^{\circ} 0'$

Thurs 29
Dec 1

Since last night the weather has been calm &
cloudy but much squalls to fall some times
Lat $32^{\circ} 17'$ Long $146^{\circ} 12' W$

Fri 30

Attended with local and steady weather
with some dry winds at all
Lat $32^{\circ} 0'$ Long $147^{\circ} 0' W$

Sat 31

Attended with calm and steady weather
until fairly a close this morning when we took
a light S of E course Lat $32^{\circ} 40'$ Long $149^{\circ} 12' W$

Sun 1

Attended with a light E wind and fair
weather we have made about a S of
E course in the present time
Lat $32^{\circ} 24'$ Long $150^{\circ} 12' W$

Mon 2

Attended with a heavy E wind and
much steady weather and Lat
 $31^{\circ} 4'$ Long $147^{\circ} 0' W$

1831

6. Attended with calm and cloudy weather
into the morning. Considerable wind which subsided
into a gentle breeze. Some light showers of rain
fell in the morning when we lay
at anchor. Lat $34^{\circ} 15'$ Long $147^{\circ} 15'$

7. Last night we saw several lights in the
clouds about which time we took in the
and sprunked over the deck. Several of the
lights were seen since which time it has
been a strong gale and the sea very rough
Lat $35^{\circ} 05'$ Long $146^{\circ} 52'$

8. Since last night attended with clouds and
cloudy weather and a moderate breeze of
wind from the East. Lat $35^{\circ} 40'$ Long $146^{\circ} 00'$

9. ~~Since~~ attended with clouds and cloudy
weather and a moderate wind until this
morning since which time it has become calm
Lat $35^{\circ} 15'$ Long $145^{\circ} 47'$

10. Fair last night until noon this day we
went out with the weather being calm and
fine at noon we took a light sail and
went on at two o'clock and all hands
collected on deck for whales which proved
not a success also got some of the
Lat $34^{\circ} 45'$ Long $145^{\circ} 15'$

11. We continued to sail last night until 7
o'clock when we stood off attended with a
light breeze of wind and short continuance
Lat $34^{\circ} 30'$ Long $144^{\circ} 45'$

Nov
Wind

Attended with a light wind and
cloudy weather this day I have spent
a leisurely morning on board of the ship
lying at anchor.

2 Since last night attended with a light
weather this morning we Capt. Cady left
that left us in the 20th took them on board of
the ship in the forenoon and at 2 o'clock
we hoisted up signal to anchor for the first
of the morning with a light S. wind and
steved on the ground S. E. by E. Lat. 44° 00' N.

3 Attended with a light wind and cloudy
weather and a calm sea and at 10 o'clock
left the ship in the forenoon.

4 Since last night attended with a strong gale
from the E. by S. at sunset we took in the
mainsail and double reefed the topsails
for anchor and at one o'clock hauled up
the fore sail and took in the mizen top sail
and again at eight o'clock we set it which
the only sail that we have been able to make
since we were out of the harbor. The weather
wind cold. Lat. 30° 17' N Long 117° 40' W

5 Attended with a strong S. wind and
fair weather. Capt. Cady making a
distance 108 miles in 24 hours. Lat. 28° 58' N Long 115° 40' W

6 Attended with fair weather and light wind
running from S. W. to S. E. and at 10 o'clock
100 miles distance since last night.
Lat. 27° 30' N Long 114° 00' W

Lat 8° 30' N Long 99° 0' W

81. Attended with light trade winds and fair weather. Arrived at 2 P.M. at 10.00 P.M.

Went down. Continued driving through the
 night with some gentle showers of rain but
 it became fair in the morning and at ten o'clock
 sperm whales were seen about 3 miles off.
 All three boats went after them as soon as
 possible. In about half an hour all three boats
 found the different whales but the 3rd boat
 was the first to capture the whale. The
 vessel on his line with it whilst we killed
 the other two then being such a large

Attended with the same large number of small crabs
in culture. not any thing noticed until 11 o'clock
when two small whales Lardoned heads were
both turned round the inside part of the
cave. Head of one of them was the
head of a bear or gas not any thing
seen. Lat 74° 40' N Long 98° 40'

stands to sea with the lights of the coast
which were visible in the distance

1173

We lay at anchor here ten days and
 the time took about 2⁵⁰. I collected
 a great deal of small things for sale and some
 them I carried on several occasions. It is not
 a good idea to produce a great number
 of small things of any description. The
 Spaniards and Indians I collected some
 the principal ones. There is several species
 of Lure birds here but I cannot give any
 description as I have not seen them. I
 have observed that by the appearance of weather
 it is more than probable that there is some
 season here, I will not in the winter
 I collected

Thurs 17

At anchor with light winds and fair weather
 making me looking some being still in
 sight of Southern Island
 Lat 122° Long 88° 0' W

Wed 18

At anchor with fair weather and light
 winds making about on O Court in
 the morning. Lat 125° Long 88° 0' W

Thurs 19

At anchor with light winds and fair weather
 as before. I collected a few species of birds
 and some of them I brought on board by
 Capt. J. B. Jones. I saw some more birds
 of all the island but I found
 one of the Galapagos birds.

July 3

Spent last night attended with sitting
in the morning it was about 20 miles from
land and in the middle of the day
that I saw and order to find the harbor
of the bay but the weather being so dark and
foggy that we were not able to proceed it being
too late in the day I had to return to ascertain
as to where we were and they returned
finding a few small Spanish huts inhabited
by Indians. Lat 2° 0' N Long 82° 0' W

July 4

At daylight this morning we made sail with
a strong breeze and made good progress
about 10 miles and at 10 o'clock in 14 fathoms
of water in the harbor of the bay. Lat 1° 15' N Long 82° 0' W

July 5

Attended with light breeze of air and in the evening
the wind lightened and we made good progress

July 6

Attended with moderate weather this afternoon
saw here a small Spanish Schooner that was
made again made sail for P. M.

July 7

Attended with light winds and a
cloudy weather

July 8

Attended with light winds and a
cloudy weather

July 9

This morning we have a fine view of the
bay and the small Spanish Schooner that we
saw here has been here since leaving
and is now for sea this afternoon and
a ship is seen.

Sep 10. A very fine day. The sea was
very calm and the wind light. The
temperature was 70° at 10 AM. The
wind was light and the sea was
very calm. Lat 5° 20' S Long 87° 40' W

Tues 11

Attended with light winds and fine weather
the sea was very calm. Lat 5° 12' S Long 87° 20' W

Wed 12

No material change of weather since
the day. The sea was very calm and the
wind light. The temperature was 70° at 10 AM.
The Americans had struck him he was
killed the Lion ship and made off and
was seen by the Americans. Lat 5° 10' S Long 87° 20' W

Thurs 13

Attended with fine weather and specially
weather. Lat 5° 10' S Long 87° 20' W

1842
July 2

Attended with a moderate breeze. Cool and
clear sky. We started on Sunday this morning
encountered a shoal of sperm whales and
were here before we could ascertain
how they were they made good a mile to
the westward of us however we found the
two or three boats and chased them
about five miles then came on board.

Lat 7° 0' S Long 85° 20' W

July 3

Attended with a strong breeze of winds and
ragged weather we noticed two ships this
afternoon one off and the other

Lat 7° 0' S Long 85° 20' W

July 4

Attended with a strong breeze of winds.
at 12 noon we saw a sperm whale and
followed the track to find further but
we saw him no more and came on board at
nine o'clock and at ten we saw a shoal of
them three miles to the windward of us
at this time set out with all three boats.
The first boat struck with killed a
small one which is hauled to the ship at two
o'clock a ship also seen off and on.

Lat 7° 0' S Long 85° 20' W

July 5

Attended with a strong breeze of winds
and clear weather. At 10 o'clock we
saw a ship to the westward of us

cloudy weather the ship is a long off
our lee) Lat $5^{\circ}45'S$ Long $85^{\circ}05'W$

Jan 29

Attended with light winds moderate and cloudy
weather Lat $5^{\circ}45'S$ Long $85^{\circ}05'W$

Attended with a strong breeze of wind and
 of our ice others at 2 o'clock this afternoon saw
 Land E of us supposed to be Pringle's head
 when we were bound Lat $54^{\circ}42'$ Long $87^{\circ}00'$

Last night we have too this morning dead
 in full Land with a light wind and fair
 weather there being a number of seals in sight
 of $1/2$ of a mile from the ship
 Prisoner of New Bedford Capt. Cook -
 4 men and no oil and at 4 o'clock we got
 into harbor and anchored in 4 fathoms of
 water $3/4$ of a mile from the Town when
 we were 3 miles out coming in we rescued
 11 Spaniards from a mutiny, gave as they
 were all into the water by the boat they had
 accidentally taken. The only American
 ships here at this time were the *Proctor* of
 Nantucket and the *Harriet* of Boston lying off
 and on a number of small boats were seen

1842
 1st
 June

Attended with light winds warm and pleasant
 weather at half past 6 o'clock. From the
 point of view of the harbor the
 6 men here were seen against the
 a little ahead our anchor and on the
 sternboard. The *Proctor* was seen
 all our men were off the side
 and the *Proctor* was at the same time

1869

Mon

at 10 a.m. the boat starts off
the boat is in the water. The remainder
of it in the water. The boat then
by the damage done is considerable. That
done to her is not unknown.

Tue

Attended with moderate winds from
 E S E and fair weather
 Lat 35° 15' S Long 108° 15' W

Aug 27

Attended with a light breeze and
 fair weather meeting
 S E course in the morning
 Lat 36° 27' S Long 107° 15' W

1 The day was a storm with a strong
windy rain & fog. The day in
the morning was very foggy. The afternoon was
sent down at low tide. The weather was
and wind rising.

1 Through the night attended with light winds
and calm. The weather was very calm
at which time we saw the great seal sliding
said. Since which time the weather has been
fine we also this afternoon took in our Starboard
anchor. Lat $38^{\circ} 10' S$ Long $107^{\circ} 15' W$

2 Since last night attended with light & calm winds
and calm. Lat $38^{\circ} 15' S$ Long $107^{\circ} 15' W$

3 The day was a storm with a light
westerly wind until five o'clock when
it changed to S.W. and rain
and cloudy. Lat $38^{\circ} 15' S$ Long $107^{\circ} 15' W$

4 Attended with rough winds and rain. Since
last night a heavy moderate and varying
from E to S.W. we have made two hauls
in the main time in order to keep the
main time. Lat $38^{\circ} 05' S$ Long $106^{\circ} 05' W$

5 The day was a storm with a light
a light E.W. wind which continued to
increase until noon when it blew strong
so that we could not do much.

took in all sail carrying no more
 than storm stay & sea sail. This is done
 when it haws moderate so that we put off
 O & E again in our course unless
 that we are in a close haul. Then
 we carry away one of our foretopmast
 backstays and at 12 (2) split our main-
 topstunt this afternoon took in our two
 foretopmast backstays and sent away main topstunt
 Lat $38^{\circ} 42' S$ Long $104^{\circ} 33' W$

Attended with cloudy weather and a
 strong E breeze and a rugged sea our
 course O & E making about 6 knots an
 hour in the mean time
 Lat $39^{\circ} 40' S$ Long $102^{\circ} 0'$

Attended with clouds and wet weather
 during the night, winds very variable
 in the mean time until daylight
 when it haws to be a strong E wind &
 weather becoming more serene. Lat
 Lat $40^{\circ} 15' S$ Long $100^{\circ} 15' W$

Since lun at the same rate with light
 E wind and good sea. Lat $40^{\circ} 15' S$

11 11
Nov 10
10

Since last night attended with
a strong gale with squalls of rain
the wind is now strong N.E. &
the sea is very high. The barometer
stands at 30.0. Lat 46° 37' S Long 94° 27' W

Nov 11

Since last night attended with a
strong gale from E. & N. accompanied with
squalls of rain and squalls of rain
at sunset we darkened rapidly and the sea
and at ten o'clock took in the main sail
at eight in the morning took in fore and
main topsails. The vessel is now on
a beam sea and all well. Lat 46° 37' S Long 94° 27' W

Nov 12

Last night at sunset we have now ship
too under close reefed main topsail and
stay sails at eight o'clock the weather
moderate we see the gale
and do not see any ice. Bore in the morning
when we were low the wind
blew strong and we have remained so
since the wind at S.W. and blowing
a strong gale attended with squalls of
rain and sleet. Lat 46° 37' S Long 94° 27' W

Nov 13

Since last night the gale has increased
and angry. Both are attended with rain in the
time under stormy squalls of rain and
sleet. Lat 46° 37' S Long 94° 27' W

1833

March 17

Attended with a strong gale of S.W. wind
Since that time we have been on a S.E.
and the sea uncommon rough and
thunder of hail and rain through the
day. Lat 35° 15' Long 9° 10' W.

March 20

Since last night attended with a S.W. gale
of wind accompanied by squalls of rain
and hail and a S.E. by E. breeze
from the morning. A heavy rain
fell from 10 o'clock and ceased for a while. Since
then we have been howling too under storm
clouds. Lat 35° 45' Long 14° 15' W.

March 21st attended with uncommon rough
weather through the night and
the sea time in the morning
and the day. Lat 35° 45' Long 14° 15' W.

March 22nd attended with light winds from the
S.W. and a S.E. breeze. Lat 35° 45' Long 14° 15' W.

March 23rd attended with light winds from the
S.W. and a S.E. breeze. Lat 35° 45' Long 14° 15' W.

11th July 1893
 weather at 7 o'clock this morning, we changed
 our course to S E since which time we
 have been under close reef for and
 to species continuing in the vessel and
 weather sea. Lat 53° 42' S Long 87° 10' W

Since last night attended with strong winds
 from the Southward and Westward and
 foggy and squally weather in the morn-
 ing we have been under close reef between
 10 and 11 o'clock. Lat 54° 56' S Long 86° 20' W

We had foggy and squally weather
 till 3 o'clock this morning when we took
 in our topsails and have been since which
 time we have made a strong gale of wind
 from S attended by squalls of rain and rain
 till 5 o'clock. Lat 55° 00' S Long 85° 00' W

12th July
 Last night at 7 o'clock the gale abated and
 we made sail since which time we have
 had a strong S.W. wind and squally weather
 and squally weather since 11 o'clock.
 Lat 55° 00' S Long 84° 20' W

The wind (bearing) almost as before
 the morning we have been under close reef
 and topsails for top and foremast. Lat 55° 00' S Long 83° 10' W

13th July
 We had a very heavy night until
 11 o'clock. Last night 54° 13' S when we found
 in all sail and have too much of wind
 continuing to blow a strong S.W. wind
 57° 30' S

1891
Apr

At 10:00 AM we were
in the ice, the wind was
strong and the sea was
rough. The ice was
of the nature of a
gale, we have since in a Southern
element.

1891
Apr

suggested at 20 fathoms day bottom
Lat 29° 54' Long 27° 30'

18
Apr
Mon

21 Attended with strong breeze of wind
and weather we kept
at anchor at night the night wind
at daylight in the morning we were
close in with the land we also here
in afternoon with light wind we set
sails and the ship went on
from the port in a few hours of sail
the night of the 22nd we were
in the morning at 27° 22' Long 48° 10'

19
Apr
Tue

30

Attended with fair weather and light
south wind we went about 10 miles
up our anchor and down to the shore
and again came to anchor in 4 feet of
water about 10 miles from the shore
we saw the shore of the Bay of
Porto Rico Big, the appearance
of the country is remarkable broken and
mountainous but the verdure is
even to the summit of the highest

20
Apr
Wed

Attended with a light south
wind fair weather and a minor
weather we have this day been
laying in St. John's (leaves in the
harbour) and on the 21st we
went to St. Catharines

100

The night of the 14th of May 1841
 I left the morning we have left
 the ship the 16th of May at 10 o'clock
 and we did not reach our destination
 more than 10 miles away from the shore
 three of the ships were left and we
 find no time to leave of them. The
 place is inhabited by Portuguese who
 are degraded by their habits as we were
 months of the day which is almost
 impossible for the country is so barren
 and the soil is so poor that it is not
 possible to raise more than a few

1888

June 11

2 miles

Attended with light wind and
fair weather and at 10 AM
at 10 AM started hunting for seals and
hearing off one seal again at two
o'clock this afternoon saw another
off one seal again at two o'clock
and we spoke -

Lat 47° 10' N. Long 121° 10' W.

June 12

12

Attended with fair weather and
a light Westerley wind & a calm sea
until one o'clock (P.M.) when we
were opposed by a large shoal
of seals which having off one seal
at 10 AM we may be at 10 AM
and two seals and one seal
and after about 3 hours fatigue we
succeeded in killing a small one
which was found to be a seal
of the same kind but before sunset
we were back at 10 AM

March 15 Last night we have two about 10 miles S.W.
of Block Island and at eleven o'clock
it commenced blowing a strong gale
attended with rain. Thunder much lighter
this morning it being fair with a strong breeze
and we started in at 7 o'clock made the West
end of Long Island at ten o'clock took on
board and at 7 o'clock the evening tide
was making it high water.
